

Multimodal

Multimodal logistics and flow consolidation

Published on 2 April 2021

HAROPA gateway to Europe

HAROPA is the 1st port complex in France bringing together the ports of Le Havre, Rouen and Paris, at the heart of a European corridor.

HAROPA benefits from an exceptional geographical situation

The first northern European port for import/export, it serves the leading consumer basin in France and the second largest in Europe.

Competitive multimodal connections for a global, fluid, fast supply chain connected to Europe's industrial markets.

HAROPA provides you with 4 multimodal hubs and collection points for the massification and distribution of your goods for import and export, in containers and swap bodies.

Capacity for reception, storage and massification of flows

57 maritime and inland waterway terminals accessible 7 days a week, 24 hours a day

Secure multimodal terminals

Value-added services: storage of empties, hazardous materials, washing, repairs, weighing...
