

# River hinterland supply and urban distribution

The Seine, the natural asset of the ports of HAROPA PORT, for a fast, economical and sustainable supply chain for the transport of all your goods in France and Europe.

Published on 2 April 2021

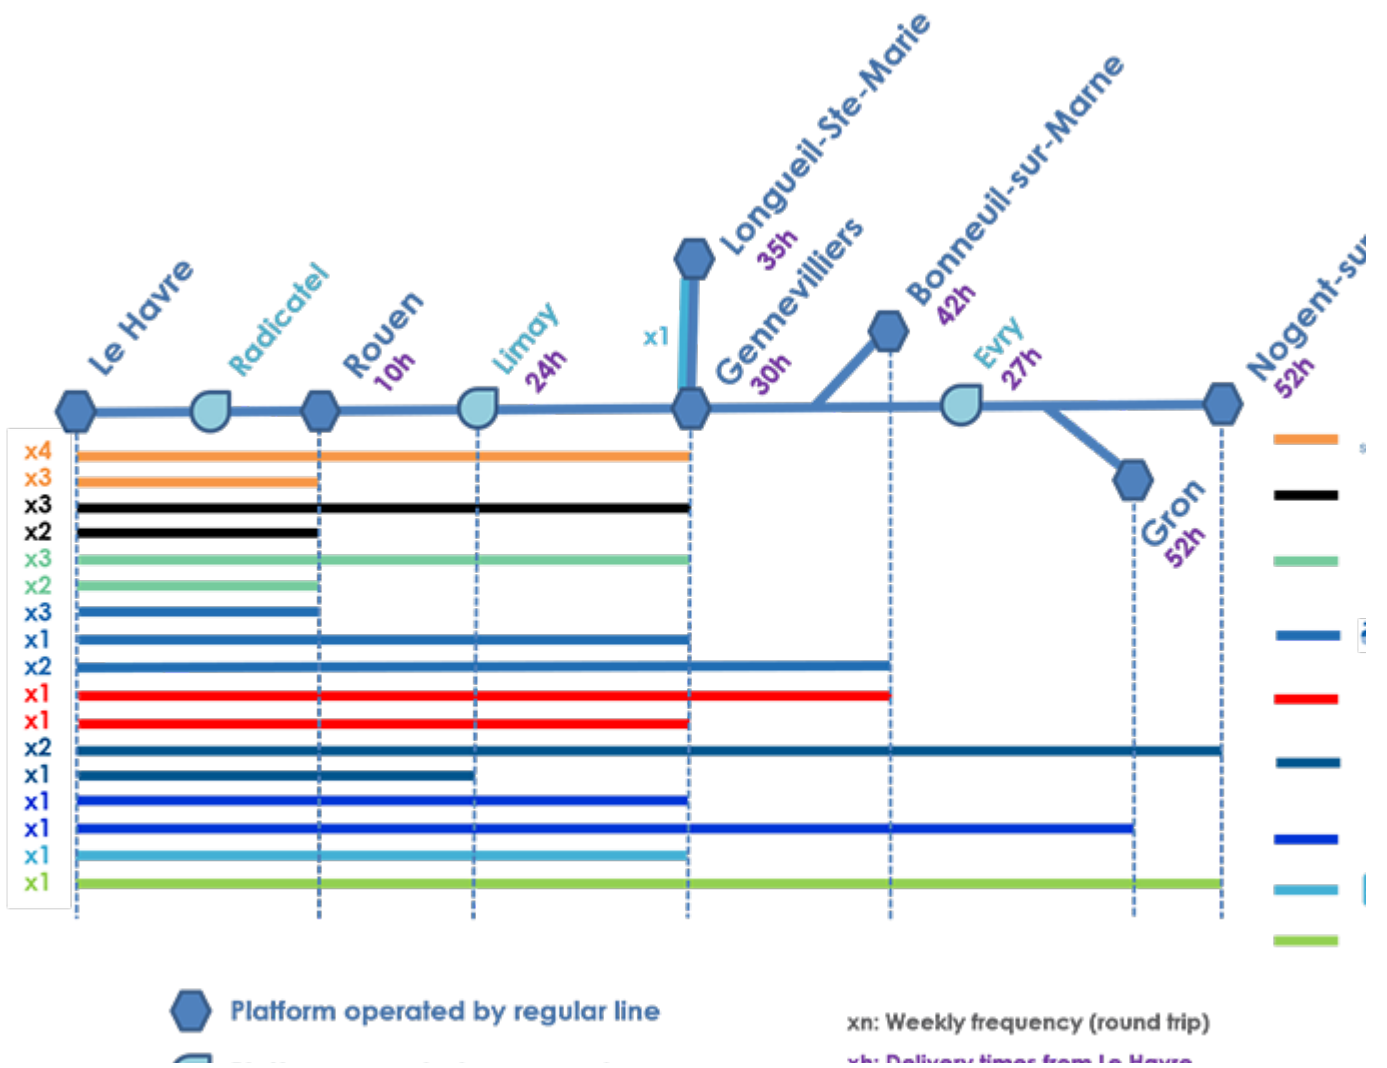

- › **1** container out of 5 destined for Ile-de-France consumer markets passes through the Seine
- › **500 km of navigable waterways** to Champagne-Ardenne and Burgundy
- › **34 million** tonnes transported
- › **400,000 TEUs** of river activity
- › **35** weekly river services

All types of goods for all types of packaging: solid or liquid bulk, heavy packages, all types of containers (20', 40', 45' Pallet Wide (PW), reefer, swap bodies).

## Waterway connections from and to Le Havre

URL of the page: <https://m.haropaports.com/en/river-hinterland-supply-and-urban-distribution>

Non-binding document

## Ensure integrated delivery to the Paris basin and beyond

- › COMPETITIVENESS: massification, customs advantages and advantageous parking exemptions
- › SIMPLE: a single end-to-end contact for your supply chain
- › RELIABLE AND CONSISTENT: daily services from Le Havre and Rouen to Ile de France
- › JUST IN TIME: proximity to inland terminals = fast delivery = less waiting for trucks = adaptation and flexibility
- › SUSTAINABLE: energy and environmental efficiency of freight transport
  - ◆ Reduction of road congestion and noise pollution,
  - ◆ 5 times less fuel consumed and 2.5 times less CO2 emissions

# The river, a punctual network that's not overloaded

**99.5%:** river availability rate - navigation/infrastructure - from Le Havre to Bonneuil-sur-Marne

## **100% punctuality:**

- › river network not overloaded;
- › traffic 24/7;
- › guaranteed transit times allowing flexible delivery solutions (night, weekend).

## **100% security:**

- › secure, guaranteed theft-free inland terminals
- › inland waterway transport carried out in the safest conditions, eliminating the constraints and risks associated with road transport
- › Interconnected with customs: integrated customs procedure

# URBAN RIVER DISTRIBUTION, a logistical reality

- › Create a river link between logistics platforms and urban ports
- › Improve mobility, get out of road traffic and into the heart of urban areas and reduce CO2 emissions
- › Towards the use of clean vehicles for the last kilometre(s)

→ Exemplary success unlike any other in Europe and constant innovation

Urban Logistics (UL) makes it possible to transport the flow of goods entering, leaving and circulating in the city under the best conditions for:

- › All goods: Construction and Recyclable Products, high value-added products,

URL of the page: <https://m.haropaports.com/en/river-hinterland-supply-and-urban-distribution>

exceptional packages...

- All packaging: containers, swap bodies, pallets, bulk, drums, on-board delivery vehicles (bicycles, light or heavy vehicles, etc)
- All delivery methods: e-commerce, out-of-home catering (restaurants, fast food, public or private authorities), points of sale, parcel relay, etc.
