Published on 2 April 2021

A direct connection to the main French and European markets

- › connection in less than 10 min. to European motorway networks via the A131 and A29
- › direct connection with the south-west as well as Spain and Portugal via the A28
- › quality infrastructure and competitive services to clear goods: 300 companies offer road transport services

Guaranteed fluidity:

- A Traffic Control and Regulation Station (TCRS):
 - ◆ Prohibition to operate mobile bridges during peak hours (morning and afternoon),
 - ◆ Information on traffic restrictions (accident, works etc) for better organization of trips.
- 9 min 50: fluidity of the road network, from the entrance into the Industrial-Port Zone to the maritime terminal gates,
- Development of mobile apps to offer dematerialized services to road hauliers

Green aspect:

- 93,4% of the current fleet of road hauliers has Euro 5 and 6 technology;
- Eco-driving course for truck drivers, Start and Stop on certain vehicles, green tyres, air deflectors, etc.,
- Working group and areas for improvement, development of LNG-CNG station on the Seine Axis,

and also:

- management of port access badges for drivers via a secure site accessible online 24/7
- increase in the available capacity of truck parking areas
- more services offered to carriers
