HAROPA PORT at the top in security

- Territorial Department of Rouen -  
Published on 13 February 2019

HAROPA PORT is one of the most important entry-exit points on the national and European territory.

HAROPA PORT is constantly redefining, in its port security plans, strategic areas and procedures to maintain an optimal level of security throughout the supply chain.

- ▶ ISO 9001 - 2015
- ▶ Ports and Rouen port installations compliant with ISPS (International Ship and Port Facility Security) code.

Many actors in the logistics chain of the HAROPA PORT area benefit from the AEO (Certified Economic Operator) certification.
