

Shortsea offer

Published on 26 February 2019

The finest maritime transport

HAROPA PORT's shortsea services fulfil two functions:

- ▶ to promote intra-European trade through alternatives to road mode: via dedicated short sea shipping services and the marketing of shortsea shipping transport segments by inter-ocean service operators;
- ▶ to offer an extension to inter-oceanic lines by transshipment to one of the feeder services provided by shipping companies specializing exclusively in this type of relay transport.

From HAROPA PORT, distribution across Europe by sea is divided into 3 types of traffic:

- ▶ feedering, to all French and European ports,
- ▶ car ferry connections to Great Britain,
- ▶ RORO and LOLO traffic: to England, Ireland, Spain, Turkey and Greece.
