

Supply chains of HAROPA - Port du Havre

HAROPA logistics offer and goods services

The leading port complex in France, HAROPA is the 5th largest in northern Europe with more than 120 million tonnes of maritime and river traffic.

With 500 ports reached worldwide and a transit-time better than its main rivals, HAROPA meets its customers' expectations for an end-to-end solution assembly. This maritime offer is supported by a multimodal offer along the entire Seine axis for a European hinterland.

Thanks to its first-rate reception capacities, HAROPA provides a competitive commercial offer, both for imports and exports, with high-performance maritime and river terminals. Container, ro-ro, bulk, conventional... all services are carried out in synergy with professionals from the HAROPA community according to the expectations of each industrial sector.

HAROPA has a "one-stop shop" for high-performance and secure customs procedures.
