

Supply chains of HAROPA PORT

HAROPA PORT logistics offer and goods services

- HAROPA PORT -
Published on 8 January 2019

The leading French port, HAROPA PORT is the **4th largest in northern Europe** with near **110 million tonnes of maritime and river traffic**.

With **620 ports reached worldwide** and a transit-time better than its main rivals, HAROPA PORT meets its customers' expectations for an end-to-end solution assembly. This **maritime offer** is supported by a **multimodal offer** along the entire Seine axis for a European hinterland.

Thanks to its first-rate reception capacities, HAROPA PORT provides a competitive commercial offer, both for imports and exports, with high-performance maritime and river terminals. Container, ro-ro, bulk, conventional... all services are carried out in synergy with professionals from the HAROPA PORT community according to the expectations of each industrial sector.

HAROPA PORT has a "one-stop shop" for high-performance and secure customs procedures.
